Organization: Bridgewater Greenhouses

General Comment

As a greenhouse grower, in business for 51 years, producing bedding plants inside of greenhouses, this EPA draft is out of control. We grow flowering and vegetable plants inside of greenhouse buildings. There is no water run-off, no chemicals that go outside of the buildings. The only water run-off, is the water that falls from the sky and runs off the sides of the buildings. The water does not gather any chemicals or fertilizers, so the water is not gathering Nitrogen or Phosphorus and spreading it. This draft of the EPA needs much more discussing and study. The expenses of implementing any of the practices, will put all agriculture in VA out of business. Thank You.
